JKC AUSTRALIA LNG PTY LTD

Ichthys Project Community Bulletin # 8

Progress continues this week on the Ichthys LNG Project being constructed by JKC Australia LNG Pty Ltd (JKC), with works being undertaken at Howard Springs Accommodation Village, and at the onshore LNG facility at Blaydin Point.

This week's expected activities at JKC construction sites include:

Blaydin Point

- Continuing heavy rock transport from DAC Howard West quarry (Yarrowonga) to the Blaydin Point site via Jenkins Road
- Up to 10 trucks per day will be working across two 12-hour shifts
- Some large equipment for ground improvement activities, including cranes, will start being transported to site
- Wickham Point Road intersection upgrade continues

Howard Springs Accommodation Village

- Ongoing mulching activities which may cause some noise between the operation hours of 8.30am and 5.30pm

- Site preparation and top soil removal will begin
- Potential noise and dust impacts will continue to be monitored.

No construction will take place on Sundays.

JKC Australia LNG is committed to the safety of the community and our workers during the construction phase of the Ichthys LNG Project.

Please help JKC and our subcontractors safely share the road network.
